Why Us

Address your use case with our gateway

Customization

The white-labeled gateway can be customized to meet the specific needs of each client.

Branding

You can apply your clients' branding to the gateway, making it appear as if it's your product.

Compatibility

This ensures that your clients can integrate their existing devices seamlessly.

Data Collection

The gateway aggregates data from various sensors and devices within the industrial setting.

Key Problems in Industrial Automation

⭐ **Integration Complexity**

Arises from a combination of technical, organizational, and operational factors.

⭐ **High Costs**

Srategies such as cost-cutting measures, process optimization, strategic sourcing, budgeting.

⭐ **Scalability Issues**

Ongoing process that requires careful planning, testing, as systems and workloads evolve.

⭐ **Security Risks**

Security risks are an ever-evolving challenge, and cybersecurity

Simplify Sensor Integration

1 ## Temperature

A key factor in many chemical reactions and biological processes.

2 ## Vibration

Beneficial and detrimental effects, depending on the context.

3 ## Machine Status

Business operations, and automation in a wide range of industries.

4 ## Barcode

Business operations, automation in a wide range of industries.

Integrate with Process

Strategies such as cost-cutting measures, process optimization, strategic sourcing, and budgeting.

Capture Machine Data

Monitoring and collecting data from various sources such as sensors, logs and system metrics.

Trigger Localized Alerts

Specify the condition or evets that should lead to this alert and the method by which it should be delivered or localized.

Automate Maintenance Request

Request repairs maintenance or servicing for equipment facilities or other assets that require attention.

▶

Request for Brought out Parts & Tools

Request for BOP parts when short of supply without running around

Manage Recipes

Configure raw material used depends on the industry and the products being produced

▶

Market We address

We focus on embedded white-labeled solutions to optimize the development cycle efficiently. Market cap of the Products we produce SOM, GATEWAY, and HMIs
